## VIDYAVARDHAKA COLLEGE OF ENGINEERING

Autonomous Institute, Affiliated to Visvesvaraya Technological University, Belagavi

Gokulam, 3<sup>rd</sup> Stage, Mysuru 570 002

Fifth Semester B.E. Examinations

COURSE NAME: Automata Theory

Duration: 3 hours

Max. Marks: 100

### INSTRUCTION TO STUDENTS

- 1) Answer One Full question from each module.
- 2) Three module questions are compulsory and the remaining two modules will have internal choice.
- 3) Each module carries 20 marks.

Q. No.	Module-I	Marks	BL	CO																											
1. (a)	Explain the following terms with an example each. (i) DFA and NFA (ii) Alphabets and Strings (iii) Operations on languages	7	L2	CO1																											
1. (b)	Apply the minDFSM(M:DFSM) algorithm to minimize the given DFA. <table border="1"><tr><th><math>\delta</math></th><th>0</th><th>1</th></tr><tr><td><math>\rightarrow A</math></td><td>B</td><td>F</td></tr><tr><td>B</td><td>G</td><td>C</td></tr><tr><td>*C</td><td>A</td><td>C</td></tr><tr><td>D</td><td>C</td><td>G</td></tr><tr><td>E</td><td>H</td><td>F</td></tr><tr><td>F</td><td>C</td><td>G</td></tr><tr><td>G</td><td>G</td><td>E</td></tr><tr><td>H</td><td>G</td><td>C</td></tr></table>	$\delta$	0	1	$\rightarrow A$	B	F	B	G	C	*C	A	C	D	C	G	E	H	F	F	C	G	G	G	E	H	G	C	8	L3	CO2
$\delta$	0	1																													
$\rightarrow A$	B	F																													
B	G	C																													
*C	A	C																													
D	C	G																													
E	H	F																													
F	C	G																													
G	G	E																													
H	G	C																													
1. (c)	Design a DFA for the following languages: i) Language that has decimal strings which are divisible by 3. ii) $L=\{w w\in\{a,b\}^* : \text{every } w \text{ has odd number of } a\text{'s and even number of } b\text{'s.}$	5	L4	CO4																											
Module-II																															
2.(a)	Obtain the regular expression for the following languages: i) Strings of a's and b's having odd length. ii) $L = \{a^n b^m   n \geq 0, m \geq 0, n + m = \text{even}\}$	5	L3	CO2																											
2.(b)	State and prove pumping lemma for regular languages. Check whether the language $L= \{0^n \mid n \text{ is prime}\}$ is regular or not.	10	L4	CO3																											
2.(c)	Demonstrate how regular languages are closed under complementation and design an automaton for the same.	5	L4	CO4																											
(OR)																															

# MODEL QUESTION PAPER : 2024-25

Course Code: BCSAT504

3.(a)	Illustrate how regular languages are closed under union and concatenation with suitable examples.	5	L3	CO2												
3.(b)	Analyse the regular expression from the given DFA using state elimination method.	10	L4	CO3												
	<table><tr><td><math>\delta</math></td><td>a</td><td>b</td></tr><tr><td><math>\rightarrow *1</math></td><td>2</td><td>{}</td></tr><tr><td>*2</td><td>3</td><td>1</td></tr><tr><td>3</td><td>3</td><td>1</td></tr></table>				$\delta$	a	b	$\rightarrow *1$	2	{}	*2	3	1	3	3	1
	$\delta$				a	b										
	$\rightarrow *1$				2	{}										
	*2				3	1										
3	3	1														
3.(c)	Design a finite automaton for the given regular expression. i. $(0+1)^*0(0+1)^*0$ ii. $1^*0(0+1)^*$	5	L4	CO4												

## Module-III

4.(a)	Construct an equivalent CNF for the given CFG by eliminating $\epsilon$ - productions, unit productions and useless productions. $S \rightarrow aACa$ $A \rightarrow B a$ $B \rightarrow C c$ $C \rightarrow cC \epsilon$	10	L3	CO2
4.(b)	Analyse the given languages and construct a CFG for the same. i. $L=\{a^n b^n c^m : n \geq 1, m \geq 0\}$ ii. $L=\{a^n b^{n+2} : n \geq 0\}$ iii. $L=\{w \in \{a,b\}^* : n_a(w)=n_b(w)\}$ iv. $L=\{ww^R : w^*\}$ v. $L=\{0^i 1^j : i \neq j, i \geq 0 \text{ and } j \geq 0\}$	10	L4	CO3

## Module-IV

5.(a)	Convert the given CFG into its equivalent PDA. $S \rightarrow aSb$ $S \rightarrow a   b   \epsilon$	10	L3	CO2
5.(b)	Examine the language $L = \{WCW^R : W \in \{a, b\}^*\}$ to construct a PDA and draw the transition diagram to check the ID : aabcbaa.	10	L4	CO4

## Module-V

6.(a)	Explain the techniques for TM constructions.	13	L2	CO1
6.(b)	Illustrate that if M is a nondeterministic TM, there is a deterministic TM $M_1$ such that $T(M)=T(M_1)$ .	7	L3	CO2

## (OR)

7.(a)	Explain the post-correspondence problem and halting problem for TM.	13	L2	CO1
7.(b)	Construct a Turing machine to accept a languages of palindrome over $\{a,b\}$ .show string acceptance for the string "abaaba".	7	L3	CO2
